B2M CFS - GDI SIMULATION
 Combat Firing Simulator

EADS
GDI SIMULATION

Designed by GDI Simulation, The B2M CFS can be used for combat training in real conditions but with no risk and no ammunition consumption.

The adaptation on the hecate II rifle is the result of a collaboration between GDI Simulation and PGM PRECISION. This system is intended to both technical firing instruction and tactical training for the sharpshooters.

A modern mean of training

- Any calibre from 7.62 mm up to 105 mm
- Any carrier integration (APC, IFV, BT, etc.)
- Ergonomic, unobtrusive et robust
- Reduced training costs
- Used by French Army

Benefits for the sharpshooters training

- Ergonomic and operational realism
- Ballistic simulation
- Multiple ammunition
- Can be used day and night
- Interoperable with others infantry and vehicle simulators
- Keep the original weapon unmodified
- Can be used on every existing Hecate II rifle
